

Sajitha Liyanage

Full-Stack Software Engineer

✉ sajithaliyanage@gmail.com ☎ +971 505628400 💼 [linkedin/sajithaliyanage](https://www.linkedin.com/in/sajithaliyanage) 🌐 [sajithaliyanage](https://sajithaliyanage.com) 📍 Dubai, UAE

Summary

Experienced full-stack software engineer with **over 7 years** of software design and development expertise. Proficient across a wide array of software technologies and cloud platforms. Established a track record of successfully delivering mission-critical applications and systems while maintaining the highest standards.

Technical Exposure

Backend Development

JS & NodeJS (6 years), Java (5 years), Python (4 years), Spring (3 years), PHP, Flask, Django, C/C++, GoLang

Web/Frontend Development

React (4 years), VueJS (2 years), TypeScript, Laravel

Database (RDBMS/NoSQL)

MongoDB (6 years), MySQL (8 years), Greenplum, PostgreSQL (4 years), ArangoDB, Neo4J, GraphQL

Container Platforms/Orchestration

Docker (8 years), Kubernetes (6 years), Kubeadm

DevOps CI/CD and Testing

Jenkins, GitAction, Spinnaker, Airflow, Maven, CircleCI, Unit and Integration Testing, Artillery, JMeter, Postman

Cloud Technologies

AWS (EC2, Lambda, Cognito, CloudFront, S3, CloudWatch, R53), GCP (Compute Engine, GKE, Storage)

Monitoring and Observability

Elasticsearch, Logstash, Kibana, Prometheus, Grafana, Filebeat, Metricbeat, Log4j

Blockchain

Web3, Bitcoin Client, Geth, Validators, Blockchain ETL, ERC-20, ERC-721, Proxy services, Truffle, Rust, DApps

Other

Microservices, Firebase, ESB, Restful APIs, SOAP, DevOps, gRPC, Redis, Kafka, Linux, RabbitMQ, Scrappy, Swagger, SaaS, Git, Fintech, Design Patterns

Education

BSc Honours in Computer Science

University of Colombo 📍 | Feb 2015 - Dec 2018

First Class Honours: 3.75 GPA

GCE Advance Level Examination

Nalanda College Colombo 10 📍 | 2000 - 2013

Combined Mathematics, Physics and Chemistry

Professional Experience

Software Engineer, Qatar Computing Research Institute

January 2022 - Present | Doha, Qatar

- Experience in large-scale commercial software development, demonstrating comprehensive expertise across the agile-driven design, development, testing and deployment lifecycle.
- Working with various tech stacks for application development, leveraging NodeJS, Java, and Python for robust backend and ReactJS for polish front-end development including testing.
- Manage Kubernetes production clusters (administration), Docker deployments, CI/CD pipelines, ELK based monitoring systems. Efforts resulted in increased efficiency, reduced downtime and enhanced overall system performance.

Senior Software Engineer, WSO2 Inc 📍

August 2017 - December 2021 | Colombo, Sri Lanka

- Core engineer adhered to agile methodology excelling in NodeJS and Java microservice development while actively contributing to code reviewing and promoting teamwork.
- Designed and implemented robust VM and Kubernetes-based CI/CD pipelines for Integrator runtime resulting in streamlined development and deployment processes.
- Held Release Manager position for product releases, conducted impactful demonstrations, comprehensive training and PoCs for the customers collaborating with the Solution Architecture team, resulting in more customers onboard.
- Collaborated with the customer support team to troubleshoot issues, quickly respond to customer queries, permanently solve them and reduce the turnaround time for fixes.

Full Stack Developer, Nexusitpro (Pvt) Ltd

February 2016 - March 2017 | Colombo, Sri Lanka

- Played a key role in agile development, ensuring successful system deployment for clients.
- Developed web applications for commercial purposes in Javascript and PHP to create impactful and efficient solutions.

Software Engineer (Intern), SoftVESSEL 📍

August 2014 - February 2015 | Colombo, Sri Lanka

- Worked in an agile software development team to design, develop and deploy systems for clients.
- Engaged in code review and debugging sessions to enhance software code quality and performance.

Projects

Blockstead - Smart Contract Security Auditing 📍

(NodeJS, ReactJS, MongoDB, Kubernetes, Python, Ethereum ETL, Web3, React, GoGeth-Client, Airflow, Prometheus, Grafana, ELK)

Distributed smart contract security auditing platform that provides smart contract security intelligence which detects more than 14 vulnerabilities across 12 supported blockchains.

Skills & Interests

Soft Skills:

- Excellent verbal and written communication skills
- Proven ability to lead cross-functional teams
- Strong analytical and problem-solving ability
- Collaborative team player

Domain Interests: Software Development, System Architecture, Big Data Analysis, Machine Learning

Other Interests: Mentoring, Tech Talks, Demo & Presentations, Blogging, Customer Engagements

Awards

Outstanding Contribution, WS02 Inc [↗](#)

Best-performing employee recognition
Team: Enterprise Integrator 2020-2021

Google Summer of Code, Google [↗](#)

GSoC 2018 contributor for Sustainable Computing Research Lab organization

All Island Appathon Challenge

Winner | 2016 | Team WhileLOOP
Project: Take Me There

Microsoft Imagine Cup Sri Lanka

1st Runners Up | 2016 | Team WhileLOOP
Project: Drowning Bunny (Gaming Category)

Microsoft Imagine Cup Sri Lanka

2nd Runners Up | 2016 | Team WhileLOOP
Project: Walk Mode (Innovation Category)

Microsoft Imagine Cup Sri Lanka

National Finalist | 2015 | Team WhileLOOP
Project: iMetYou (World Citizenship Category)

WS02 Rock Star - Enterprise Integrator

Recognized as a rock star in the WS02 Enterprise Integration team for open source community services

Volunteer Experiences

Mentor at Google Summer of Code

CrawlerX and ChainKeeper projects have been mentored in seasons 2019, 2020, 2021 and 2022

Mentor at Google Code-In, SCoRe Lab

Multiple projects and student submissions have been mentored in seasons 2016, 2017, 2018 and 2019

Open Source Contributor

WS02, Apache, SCoRe, and CIBR active contributions

President at ISACA Student Group

Organized inter-university programming competitions team bonding activities and hands-on sessions.

Conducting Tech Talks and Workshops

at Weligama Siddhartha College, Punawa Central College, University of Colombo School of Computing

Non-Related Referees: Available on request

Dizzy - Scalable Darkweb Search Engine [↗](#)

(NodeJS, ReactJS, Scrapy, Tor, Python, Kubernetes, Elasticsearch)
ML-powered, scalable, context-aware dark web search engine and intelligence analytics platform. Crawled and analyzed 60M dark web pages to detect illicit content, assess availability, and provide insightful analytics.

SOFFLIX HR - Customizable HR and Admin Platform [↗](#)

(ReactJS, NodeJS, JAVA, AWS, Maven, Microservices, REST API, MongoDB, Lambda, S3, Cognito, JWT, Email Server)

SOFFLIX HR provides an all-in-one platform to suit all small to enterprise-level business's HR needs. This platform delivers fully customizable capabilities to manage human resources in every aspect throughout the employee lifecycle.

WS02 Micro Integrator - Hybrid Integration Platform [↗](#)

(JAVA, JavaScript, Apache Synapse, Apache Axis2)

Micro Integrator is an open source, cloud-native integration framework with a configuration runtime that has been optimized for container-native deployments based on Docker & Kubernetes

MoneroSci - Monero Blockchain Parser & Analyzer

(C++, Python, Monero ETL, RocksDB, SQLite)

The research focuses on the privacy guarantee of Monero Blockchain and aims to develop an optimized environment for Monero Blockchain to explore and analyze patterns based on heuristics to quantify linkability and traceability.

Toshi - A Scalable Blockchain Security Analytics Platform [↗](#)

(NodeJS, ReactJS, Kubernetes, Blockchain ETL, Python, Redis, Scrapy, Elasticsearch, ArangoDB, Greenplum DB)

ML-powered, distributed blockchain security analytics platforms that support transaction risk scoring, wallet estimation, and deanonymization of cryptocurrency users and activities

WS02 Enterprise Integrator & WS02 Integration Studio [↗](#)

(JAVA, ESB, Eclipse, JAVA Patterns, Synapse, Carbon Platform)

WS02 Enterprise Integrator is an integration platform that gives lots of integration capabilities for enterprises. Integration Studio is eclipse-based visual tooling for developers to develop their integration solutions. Contributed to these products by adding new features, architectural discussions, resolving bugs, and customer support.

K8s EI Operator - Kubernetes Native Operator [↗](#)

(Go, Docker, Kubernetes, Operator SDK)

K8s EI Operator is a tool developed for deploying the WS02 integration solutions on Kubernetes with multiple automated functionalities.

CrawlerX - Distributed Darkweb Crawling Platform

(VueJS, Django, Celery, Scrapy, MongoDB, RabbitMQ, Kubernetes, Elasticsearch)

The CrawlerX is a web platform which use to crawl web URLs in different kinds of protocols in a distributed and scalable way.

Programming Teacher v2.0 - Android Mobile Application

(Android Studio, Google Play Services, Firebase)

Game based on programming and algorithm learning application for any programming lovers.
